Instructions for Authors

Journal of Superconductivity and Novel Magnetism

[Manuscript Submission](#)[Publication Policies](#)[Manuscript Style](#)[Illustration Style](#)[Special Instructions for Contributors to Letters](#)[Page Charges](#)[Springer Open Choice](#)

Manuscript Submission

Authors should submit their manuscripts online. Electronic submission substantially reduces the editorial processing and reviewing times and shortens overall publication times. Please connect directly to the site:

<http://www.editorialmanager.com/josc> and upload all of your manuscript files following the instructions given on the screen.

Publication Policies

Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The Co-editors will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.

Manuscript Style

Type double-spaced, and submit the original and three copies (including, where possible, copies of all illustrations and tables). All copies must be dark, sharp, and clear. Computer-generated manuscripts must be of letter quality (not dot-matrix).

Title Page

A title page is to be provided and should include

- the title of the article
- author's name (no degree)
- author's affiliation
- and suggested running head

The affiliation should comprise

- the department
- institution (usually university or company)
- city
- and state (or nation)

and should be typed as a footnote to the author's name. The suggested running head should be less than 80 characters (including spaces) and should comprise the article title or an abbreviated version thereof. For office purposes, the title page should include the complete mailing and telephone number of the one author designated to review proofs.

Abstract

- An abstract is to be provided, preferably no longer than 100--150 words.

Key Words

- A list of 4--5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes.

Sections

- All sections should be numbered with Arabic numerals (such as 1. INTRODUCTION). Subsections should be identified with section and subsection numbers (such as 6.1. Second-Value Subheading). If applicable, an independent single-number system (one for each category) should be used to label all theorems, lemmas, propositions, corollaries, definitions, remarks, examples, etc. The label (such as Theorem 4) should be typed with paragraph indentation, followed by a period and the theorem itself.

Mathematical Notation

- Mathematical notation should be typewritten wherever possible. If handwritten notation must be used, it should be clear and legible, with any necessary explanatory notes located in the margin. Equations should be numbered consecutively with Arabic numerals in parentheses placed flush right, and should be thusly referred to in the text [such as Eqs. (2) and (6)].

References

List references numerically at the end of the paper. Use the appropriate Arabic numeral in square brackets for citation in the text. Where there are three or more authors, only the first author's name is given in the text, followed by et al.

References should include (in this order):

- initials and last names of all authors
- name of publication
- volume number
- starting page or inclusive pages
- and year published.

The style and punctuation of the references should conform to that used in the journal -- illustrated by the following examples:

- Journal Article
 1. T. Ogushi, Y. Hakuraku, Y. Honjo, G. N. Suresha, S. Higo, Y. Ozono, I. Kawano, and T. Numata, *J. Low Temp. Phys.* 70, 485 (1988).
- Book
 2. E. W. Collings, *Applied Superconductivity, Metallurgy, and Physics of Titanium Alloys*, Vol. 2 (Plenum Press, New York, 1986).
- Contribution to a Book
 3. C. W. Chu, P. H. Hor, R. L. Meng, L. Gao, Z. J. Huang, Y. Q. Wang, and J. Bechtold, in *Novel Superconductivity*, S. A. Wolf and V. Z. Kresin, eds. (Plenum Press, New York, 1987), pp. 581--597.

Footnotes

- Footnotes should be avoided. When their use is absolutely necessary, footnotes should be numbered consecutively using Arabic numerals and should be typed at the bottom of the page to which they refer. Place a line above the footnote, so that it is set off from the text. Use the appropriate superscript numeral for citation in the text.

Illustration Style

Illustrations

- Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. All illustrations must be complete and final, i.e., camera-ready. Photographs should be large, glossy prints, showing high contrast. Drawings should be prepared with india ink. Either original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration. Reproduction of illustrations in color is possible by special arrangement, with the total cost, which is significant, borne by the author.
- Tables should be numbered (with Roman numerals) and referred to by number in the text. Each table should be typed on a separate sheet of paper.

Special Instructions for Contributors to Letters

This section is reserved for the publication of novel and highly relevant short communications of interest to the superconductivity and novel magnetism community. Interested authors should select "Letters" from the drop-down menu on the Editorial Manager submission site and provide a brief justification for their choice of this article type. The manuscript and illustration styles are similar to those for regular papers. However the length of the typed text should be limited to not more than eight double- or 1 ½- spaced pages. Reviews will be handled on an expedited schedule. If accepted, Letters will be given a high priority for inclusion in the next available issue. If the manuscript is judged not suitable for this article category, but is not rejected, authors will be offered the option to expand their paper for resubmission to JOSOC as a regular manuscript.

Page Charges

The journal makes no page charges. Reprints are available to authors, and order forms with the current price schedule are sent with proofs.

Springer Open Choice

In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springers online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit the link below to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription-model articles. We regret that Springer Open Choice cannot be ordered for published articles.
